 Sure Fertiliser Products Ltd., Knaresborough
 House, Knaresborough, HG5 0HL

WHY CHOOSE SUREGROW?

- * Weed suppressant – A Denser sward of healthy grass suppresses weed growth
- * After the very cold snowy and then wet weather, grassland used for grazing or hay/haylage needs revitalising.
- * Gate hole Management – help the damaged grass re-establish and give any newly seeded areas an early boost to support strong growth. How?
 - On a drier day rake gate hole(s) level
 - Roll or stamp area down
 - Sow seed if required
 - Apply ½ bag of Suregrow to area
 - Wait for grass to grow
- * Horse and ponies can continue to graze during and after application of Suregrow
